Air Leakage Drawing Review Checklist

Air Leakage Drawing Review Checklist

This free checklist is crafted to provide you with all the essential information for preparing your project, so you can maximise the benefit of our service.

Air Leakage Drawing Review Checklist

1. Drawings

We've set aside time specifically to review your drawings. To ensure efficiency, please only send the drawings you want us to assess for your air tightness strategy, along with any relevant notes. If the allocated time has been used up, we'll need authorisation to proceed further.

2. Target

Understanding the air leakage target is crucial because it dictates how much detail and sealing will be in the drawing review.
